E- Waste Drive 30 May 2022

E-waste is any electrical or electronic equipment that's been discarded. This includes working and broken items that are thrown in the garbage or donated to a charity resellers. E-waste is particularly dangerous due to toxic chemicals that naturally come out from the metals inside when burnt. If a product is powered electronically and someone thinks they can create a better version, that contributes to e-waste. Today, technological advances have led to numerous electronic devices that though may still be working fine but are considered obsolete – DVD players, floppy, pen drives, mobile phones just to name a few. SVIMS, believing in the sustainable development goals and itself contributing towards a sustainable environment, conducted an E-waste collection drive on 30th May 2022.

SVIMs collaborated with Swachh, Pune for collection of the E-waste. There was approx. 20 kgs of E-waste collected by the students and staff. The students approached their societies and friends to ensure a considerable amount of E-waste was collected. The collection was then donated at Swachh Center in Aundh to be processed further in the most sustainable way. Dr. Divya Lakhani, HOD, SVIMS, visited the center along with the collection.
